The Geneva AI Governance Institute (GAIGI) welcomes Priya Pansare to its Board

The **Geneva AI Governance Institute (GAIGI)**, a sector member of the International Telecommunication Union (ITU), is pleased to announce the appointment of **Priya Pansare**, Director of Trade and Investment Promotion at **the World Trade Centre Mumbai**, to its Board. This appointment reinforces GAIGI's commitment to developing bridges between **International Geneva** and major economic and innovation hubs around the world.

Before joining the World Trade Centre Mumbai, Priya Pansare also gained significant experience in the international financial sector at **Goldman Sachs**, where she held responsibilities related to corporate administration and operations optimisation. In this role, she contributed to improving organisational efficiency and internal processes in a demanding global financial environment, thereby strengthening her understanding of international economic and financial dynamics.

At **the World Trade Centre Mumbai**, she plays a central role in developing initiatives to strengthen bilateral trade relations, promote international investment and support companies in accessing global markets. Her work actively contributes to creating platforms for economic dialogue and encouraging cooperation between different players in the global economy.

Her appointment to the GAIGI Board is particularly significant in light of India's growing role in the global economy and in international discussions on governance, innovation and technological transformation. She will help to strengthen synergies between economic and institutional ecosystems, while supporting Geneva's role as a global platform for dialogue and cooperation.

"We are honoured to welcome Priya Pansare to the GAIGI Foundation Board. Her experience in promoting international trade and her commitment to global economic cooperation are a valuable asset to our mission of strengthening the links between innovation, governance and sustainable development," said Axel Mazolo, President and Founder of GAIGI.

Priya Pansare also shared her enthusiasm for joining the initiative:

"I am honoured to join the Board of the Geneva AI Governance Institute. In a world marked by rapid technological change, it is essential to strengthen international cooperation to ensure that innovation, including in the field of artificial intelligence, supports inclusive and sustainable economic development."

Priya Pansare's appointment is part of GAIGI's strategy to bring together international leaders from different backgrounds to contribute to discussions and initiatives related to the global governance of emerging technologies.

Based in Geneva, the Foundation intends to continue strengthening its role as a platform for dialogue between international institutions, governments, the private sector and civil society in order to promote responsible governance of innovation and artificial intelligence.

About GAIGI

The **Geneva AI Governance Institute (GAIGI)** is a Geneva-based organisation dedicated to promoting international dialogue, research and cooperation on the governance of artificial intelligence and emerging technologies. By bringing together decision-makers, experts, international organisations and private sector actors, GAIGI contributes to strengthening collective reflection and action for responsible innovation in the service of sustainable development.
